## about me

Open source expert and manager, problem solver, developer liaison, guide and mentor.

Thrives on curiosity, innovation and learning new things.

Loves to work in global, multicultural teams of seasoned experts in creative, scientific and technical environments.

Finds mistakes in and debugs structural, organizational and procedural systems on OSI Layers 8 to 10.

## what is important to me

Loves to learn, both private and at work. Relishes in team work, also remote, especially in communities of experts from all over the world. Encourages autonomous working/thinking/management, especially in the field of new and emerging tech. Is looking for a job that offers both focused work, human interaction and high tech, with a reasonable balance. I savor hands-on work with hardware and new/emerging technologies, including assembling hardware and solving very difficult problems that require deep research with great patience, finding long-term solutions. I thrive if I can see the results of a project that I was involved in. I love sharing with, mentoring and inspiring people.

## Expertise

- Senior open source expert and contributor, 25+ years hands-on experience with enterprise- and community-driven projects, both in software development, administration, enterprise-grade or cutting edge technologies.
- Senior manager with 20+ years of experience in working with clients from corporate, state and federal agencies, organizing and structuring processes, projects and procedures.
- Expert in collaborative community networking. Developer Liaison, bridge-builder between community and business needs, visions and compliance, usability and security. Strong focus on accessibility.
- Problem solver, researcher, analyst. Loves to add structure, develop, test, and launch emerging technologies. High skills in documenting both technical and procedural issues for a variety of audiences.

- Organizer and facilitator of public events with media partners, filmmakers and artists. Create presentations and video art, including digital video processing, editing and distribution.
- Administrating collaboration platforms like Nextcloud, Wordpress, Wikis.

## Experience

since 2019: CEO, Feilner IT, Regensburg, Germany
